Personal Projects

Lazybit Collective

Lazybit Collective is a Houston based culture club inspired by the sights and sounds of videogames. Founded by myself and close friend Matt Rivas back in 2013, we are a coalition of visual artists, chiptune musicians, podcasters and contributors of all kinds interested in curating events around the city, creating art, and sharing our designs, music and voices.

Freelance Work

One of the most rewarding aspects of having the skill set of design, is to be able to work with several different organizations and individuals and a multitude of various projects. While flying solo I have had the honor of designing for several independent musicians, venues, clothing companies, a small-batch cookie company and close friends and family.
